

# ZYGOMATIC IMPLANT COURSE

ZAGA Concept

Barcelona, Spain  
June 2<sup>nd</sup> - 4<sup>th</sup>, 2025

This intensive 3-day course leverages over 25 years of expertise in rehabilitating the severely resorbed maxilla using the Zygoma Anatomy-Guided Approach (ZAGA), developed by Dr. Carlos Aparicio.

This program offers dedicated modules on the ZAGA Concept, giving participants a comprehensive understanding of this advanced technique. Moreover, the participants have the opportunity to gain new insights into soft tissue management, zygomatic complications, and the ORIS success code.

Through hands-on sessions, attendees will practice placing zygomatic implants using dental 3D Models. With practical sessions, the participants refine their skills and confidently apply these techniques in their practice.

## OUR KEY LECTURER:

**Dr. Carlos Aparicio**  
MD, DDS, MSc, MSc, DLT, PhD

**REGISTRATION**

**+34 622 114 494**

### OUTLINE

- Cultivate a comprehensive understanding of different **surgical methodologies**, evaluating their respective advantages and drawbacks, as well as **intra-sinus** and **extra-sinus techniques**.
- Acquire **scientific and clinical insights** into the application of advanced ZAGA Zygomatic Implant treatments across diverse anatomical conditions (ZAGA 0-4).
- Gain an **evidence-based** understanding of the **ZAGA Concept**, coupled with the **ORIS Success Code**, to ensure predictable and successful outcomes.
- Explore the intricacies of prosthetic rehabilitation, focusing on the **immediate loading** of **zygomatic implants**.
- Review and critically **discuss surgeries executed on patients**.
- Master the skills necessary to **manage and mitigate complications** associated with zygomatic implants.
- Delve into the **anatomical nuances of the zygomatic regions**.
- Familiarize yourself with established **surgical protocols** for the successful placement of zygomatic implants.
- Acquire the expertise to diagnose and **formulate treatment plans**.
- Option of **hands-on practice** with the cutting-edge ZAGA-Straumann zygomatic implants using 3D models.
